

## EATON TOWN NEWS

### **Governor's Ranch and Aspen Meadows Non-Potable Irrigation System to be Operational in Mid-May**

The Governor's Ranch and Aspen Meadows non-potable irrigation system is projected to be operational in mid-May. The project to replace the irrigation pump has been a priority for the Town of Eaton since the fall of 2021 and has seen delays due to supply chain and labor shortages. Delays were also caused due to discovering the electrical line between the pump and pumphouse was faulty. A new electrical service will be installed at the new pumphouse.

The non-potable irrigation system supplies water for outside use and non-drinking purposes. Drinking water within the Governor's Ranch and Aspen Meadows neighborhoods is not affected by this project.

The project will replace the current irrigation pump and fix issues with the electrical line. Fixing issues with the electrical line has created a slight delay in the project, moving the projected completion date to mid-May 2022. The Town of Eaton remains committed to fixing issues the right way to ensure more reliability and durability in the future.
