

## Ages Birth through Age 5

Optional Insert: Kids in this age range can use the reading log for elementary-aged children OR this insert instead. Either will count toward the weekly prizes for children.

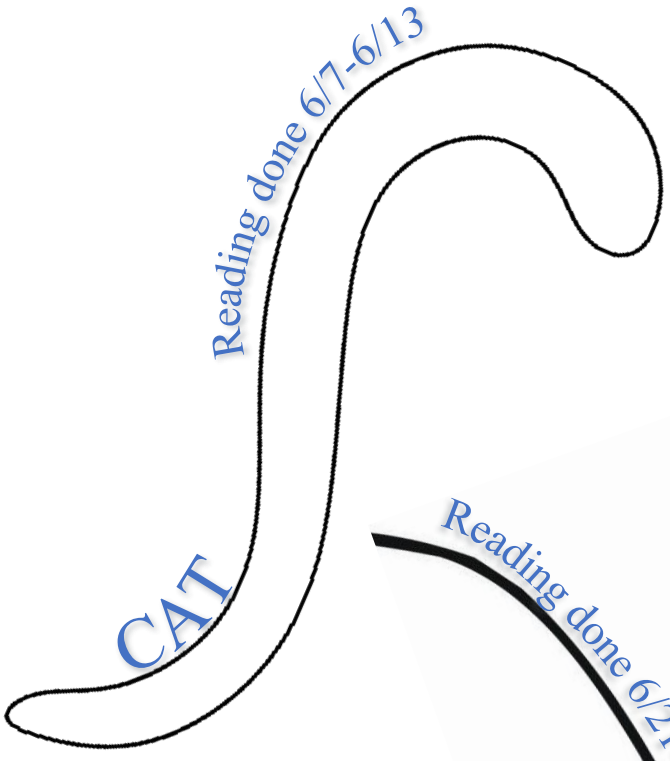

From birth to age 5, reading can include many different behaviors! All of the following activities promote early literacy and count toward Summer Reading!

Tune in to a library storytime  
Have someone read to you or with you  
Sing a song or rhyme  
Practice writing letters or numbers  
Hold a book and look at the pages  
Tell a story with your toys or dolls

Check out books from the library  
Label items around the house  
Practice rhyming words  
Retell a favorite picture book out loud  
Put pictures in order of sequence  
Look for words in the environment

Spend time each week engaged in activities from the list above and color in that week's animal tail (see dates next to tails)! Bring this sheet to the library for your weekly prize! Continue doing reading activities and checking in with the library each week throughout June and July.
